

In Switzerland, we know how to make watches.  
We also know how to stop time...

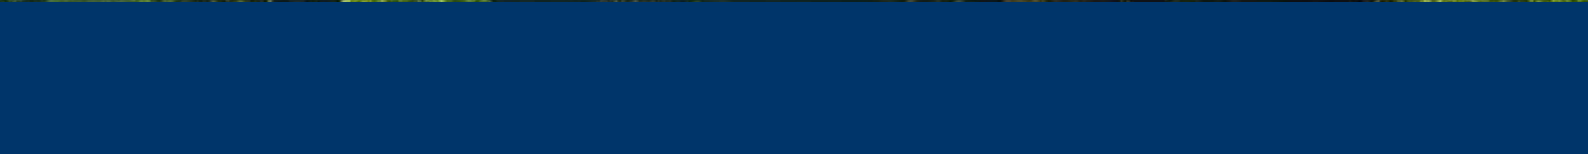

GENOLIER. A Swiss clinic at the heart of innovation.

NESCENS. A Swiss anti-aging cosmeceutical skincare system.

## **CLINIQUE DE GENOLIER: A SWISS PRIVATE CLINIC AT YOUR SERVICE**

Nestled between Lake Geneva and the Jura mountains, Clinique de Genolier is the corner-stone of the Genolier Swiss Medical Network. A real 5-star hospital, it enjoys a world-class reputation for the expertise of its medical staff and the quality of its healthcare in a range of medical specialties.

In this unique setting, Clinique de Genolier brings together international doctors and practitioners, each renowned in their field, driven to preserve and enhance health and youth capital.

Consultations and treatments, including those for anti-aging, dermatology, aesthetic medicine, plastic and cosmetic surgery, hair restoration, sport medicine and nutrition, are provided daily to Swiss and international patients seeking first-rate medical attention.

## **LABORATOIRES GENOLIER: AN AMBITIOUS SKINCARE PROGRAM**

In keeping with its innovative culture, Clinique de Genolier demonstrates its ability to build on its know-how and go beyond traditional core activities by creating Laboratoires Genolier: a center of knowledge and competence dedicated to the management of cutaneous health and care.

As the major human organ, the skin is a unique field of investigation for medical research. Under the leadership of Clinique de Genolier, Laboratoires Genolier is committed to an ambitious skincare program.

Leading this initiative, Prof. Jacques Proust and his team, assisted by other Genolier doctors and clinicians, have formulated NESSENS, a range of scientifically proven anti-aging skincare products.

## PROFESSOR JACQUES PROUST

Following several years of practice as an internist and geriatrician, Prof. Jacques Proust discovered a passion for the biology of aging. He then moved to the United States as a researcher with the Baltimore Gerontology Research Center (National Institute on Aging, National Institutes of Health) and Johns Hopkins University.

Building upon this expertise, Prof. Jacques Proust created and led the Research Laboratory of Biology of Aging at the University of Geneva, Switzerland. He later created the Center for the Prevention of Aging at Clinique de Genolier, where the most advanced scientific developments concerning anti-aging medicine are made available to meet individuals' needs.

An active practitioner, Prof. Jacques Proust still carries out research activities and holds a teaching position at the Faculty of Medicine of Geneva.

MD, Head of the Center for the Prevention of Aging,  
Clinique de Genolier

## NESCENS, SWISS ANTI-AGING SCIENCE

Resulting from advanced research by the Swiss laboratories Genolier, and formulated under the supervision of Prof. Jacques Proust, NESCENS offers a resolutely innovative anti-aging skincare approach.

The formulation of NESCENS cosmeceuticals is based on the understanding of molecular mechanisms involved in the maintenance and repair of skin structures. All products are carefully designed to address these mechanisms in their totality.

Each NESCENS preparation includes selected ingredients whose anti-aging properties are scientifically established. To achieve the highest degree of effectiveness, these active compounds are integrated in NESCENS at optimal concentrations. Night and day, their synergetic action is perfectly adapted to the skin's natural functionality and biological rhythm.

## SCIENTIFIC AND BIOMEDICAL APPROACH TO ANTI-AGING SKINCARE

**Cosmeceutical quality:** Integrates the know-how of the cosmetological, pharmacological and medical fields to combine active ingredients at concentration levels that positively influence the skin's physiological properties.

**Uncompromising formulation:** Our teams' research and innovation potential are not sacrificed to pecuniary constraints or cost-efficiency.

**Resistant to the lure of marketing and trends:** The scientific dimension alone leads to the development process of formulations. Active substances are selected solely for their intrinsic biological qualities.

**Constant reflection of anti-aging scientific research:** Product engineering is driven by non-commercial experiments conducted by independent researchers, whose results are irrefutable. Latest scientific developments are integrated into our new products and existing products are reformulated if deemed necessary.

**Anchored in the medical world:** The development process complies with stringent medical standards and products respond to clear biological skin requirements.

**Swiss guarantee:** NESSENS products are manufactured in Switzerland. They are subject to clinical assessment and evaluation performed by independent laboratories and comply with strict pharmacopeia guidelines.

130 ml  
4.4 FL.OZ.

### Cleansing Agent

Pre-skincare gel  
Face and neck

#### Ingredients' properties

- Provide a deep cleansing
- Eliminate dead cells and impurities
- Preserve the natural hydrolipidic balance
- Prepare the skin to the application of NESCENS cosmeceuticals

→ This gentle gel, emulsified with water, develops a light foam. It rinses easily and leaves skin clean and revitalized.

30 ml  
1 FL.OZ.

### Molecular Protection and Renewal Formula

Fundamental anti-aging day cream  
Face and neck

#### Ingredients' properties

- Neutralize the molecular deterioration mechanisms
- Promote the renewal of extracellular matrix macromolecules
- Interfere with glycoxydation
- Prevent the stiffening of collagen and elastin fibers
- Increase skin resistance to UV radiation
- Reduce the activity of enzymes involved in the degradation and fragmentation of structure proteins
- Limit the formation of wrinkles
- Intensely/durably hydrate the skin

→ NESCENS renewal molecular technology enhances the cutaneous tissue ability to rebuild its main markers of youth: flexibility, density and firmness. Wrinkles are filled, the skin is visibly smoothed. The skin gains in radiance.

NESCENS. Swiss anti-aging at the cutting edge of science.

30 ml  
1 FL.OZ.

### **Cellular Activation and Regeneration Formula**

Fundamental anti-aging  
night cream  
Face and neck

#### **Ingredients' properties**

- Promote exfoliation and regeneration of epidermal cells, and prevent their senescence
- Induce a powerful signal of cell division accelerating skin resurfacing
- Active synthesis of structural proteins for reconstituting the mattress support skin
- Boost the activity of natural moisturizing factors
- Lighten pigmented blemishes

→ NESCENS cell regeneration technology has potent anti-sagging action. Smoother, more toned, skin is visibly rejuvenated upon waking. The skin texture is refined, pores are tightened. The complexion is even more luminous.

15 ml  
0.5 FL.OZ.

### **Anti-Rhytide Formula with L-Fucose**

Fundamental anti-aging cream  
Eye contour area

#### **Ingredients' properties**

- Promote the proliferation of fibroblasts and active the production of collagen, elastin and glycosaminoglycans, to reduce rhytides, wrinkles of the periorbital area

→ NESCENS cell activation technology improves the appearance of periorbital tissues: the existing wrinkles are intensely smoothed, the apparition of new wrinkles is delayed. The youthful aspect of the eye contour is preserved.

30 ml  
1 FL.OZ.

### **Lipid-Replenishing and Repairing Preparation**

Fundamental anti-aging cream  
Hands

#### **Ingredients' properties**

- Prevent and correct aging-related deterioration of overexposed tissues of hands
- Increase skin resistance to external aggressions
- Restore the plasticity of tissue
- Reduce age spots characteristic of aging skin
- Promote the epidermal lipid layers reconstitution
- Stimulate the renewal of structural proteins
- Protect against free radical attacks

→ The clinical signs of aging are visibly corrected: skin dryness/roughness are diminished, fine lines erase and brown spots fade. Hydrated, intensely replenished, the skin regains softness, substance and elasticity. The appearance of the hands is rejuvenated.

15 ml  
0.5 FL.OZ.

### **Keratolytic Complex**

Intensive exfoliating preparation  
Face and neck

#### **Ingredients' properties**

- Induce flattening of the cutaneous surface
- Highly efficient method for smoothing and renovating tissue
- Increase cell proliferation and bio-synthesis of molecular components, improving the skin mechanical properties (elasticity, firmness, tone)
- Strengthen the skin barrier properties and counteract the effects of photoaging

→ The NESSENS resurfacing technique operates a real skin recapitalization. The skin is retextured, visibly smoothed, as tightened. The pores are tightened, the complexion is more uniform. The youth of the features is restored.

50 ml  
1.7 FL.OZ.

### Restoring Complex

Integral regenerating mask  
Face and neck

#### Ingredients' properties

- Deliver an active substance essential to the restoration of hydrated, healthy and strong tissue and to the defuse of skin irritation mechanisms inherent to aging
- Participate to the reconstitution of epidermal lipid layers, facilitating the consolidation of the intercellular cement and the protective function of the skin
- Reduce skin reactivity resulting from thermal, physical and chemical aggressions

→ Under the action of the NESCENS restorative preparation, the skin recovers its resource and capacity for self-defense. Soothed, rejuvenated, she regains suppleness and comfort. The features are rested, and the complexion is luminous.

15 ml  
0.5 FL.OZ.

### Correcting Concentrate for Uneven Pigmentation

Anti-dark spot cream  
Face and body

#### Ingredients' properties

- Combine the best performing assets, with demonstrated clinical efficacy in reducing age spots induced by ultraviolet radiation and age
- Interfere with the process of melanization
- Prevent radical attacks
- Filter solar radiations

→ NESCENS marks a significant step forward in correcting skin alterations associated to photo-aging. A regular use of this preparation helps to rejuvenate the appearance of skin: pigmentation blemishes are lightened, uniformity and clarity of tissues are restored.

		DAY SYSTEM	NIGHT SYSTEM	
1	<u>PREPARATORY PHASE</u>			<b>Cleansing Agent</b> Pre-skincare gel – Face and neck
2	<u>FUNDAMENTAL CARE</u>			<b>Molecular Protection and Renewal Formula</b> Fundamental anti-aging day cream – Face and neck
