LABORATOIRE

THE EXPERT
IN AESTHETIC
DERMATOLOGY

COSMECEUTICAL CARE

OUR PHILOSOPHY:

Performance, Research and Development

The laboratory's objective is to offer doctors and patients a range of high-quality, targeted products that support their aesthetic treatments.

Dermaceutic was one of the first lines to introduce into its formulas what have become essential skincare ingredients, including hyaluronic acid, stabilised vitamin C, and glycolic acid.

Dermaceutic offers a scientifically proven, highly efficient range of products, and an unrivalled concentration of active ingredients in its formulas.

We carefully formulate our products to preserve all the benefits of each active ingredient.

PREPARE, OPTIMISE, IMPROVE AND PROLONG THE RESULTS OF MEDICAL AESTHETIC PROCEDURES.

6 Essential Actions

PURIFY

Cleanser 5

Gentle Exfoliant
Glycolic acid and allantoin

Foamer 15

Exfoliant Foam
Glycolic acid and enoxolone

Mask 15

Oil Reducing Mask
Glycolic acid and bentonite

STIMULATE

Light Ceutic

Skin Toning Night Cream
Glycolic acid, phytic acid and vitamin C

Turn Over

Stimulating Night Cream
Glycolic acid

TARGET

Yellow Cream

Dark Spot Concentrate
Kojic, glycolic and salicylic acid, arbutin, liquorice and morus alba

PREVENT

C25 Cream

Antioxidant Concentrate
Vitamins C, A, B5, E and polyphenols

PROTECT

Sun Ceutic

Anti-Aging Sun Protection
Zinc oxide, titanium dioxide, hyaluronic acid and aloe vera
High sun protection (SPF 50)

RESTORE

Hyal Ceutic

Intense Moisturizer
Hyaluronic acid, aloe vera, jojoba oil and vitamin E

K Ceutic

Post-Treatment Cream
K complex, glycoprotein, vitamins C and E
High sun protection (SPF 50)

Cleanser 5 GENTLE EXFOLIANT

Gentle Exfoliating Lotion

Removes impurities and dead cells, and gently purifies the skin.

Cleanser 5 is recommended for dull complexions with an irregular texture.

RESULT

The skin becomes smooth and silky, radiance is restored and pores are tightened.

ACTIVE INGREDIENTS

The glycolic acid removes impurities and dead cells from the skin while allantoin soothes and repairs. This combination of active ingredients gently stimulates cell renewal.

Glycolic acid 5%

One of the alpha hydroxy acids (often called "fruit acids"), this very small molecule easily penetrates the skin and its acidic pH accelerates exfoliation by destroying the links that bind dead cells together.

Allantoin

Renowned for its moisturising, soothing and anti-irritant properties, allantoin is a keratolytic agent that stimulates cell proliferation and the formation of healthy tissue.

50 ml
No paraben and no fragrance

PURIFY

PURIFY

Foamer 15

EXFOLIANT
FOAM

Expert Cleanser

Removes impurities and dead cells, and purifies the skin. Foamer 15 is recommended for dull complexion, irregular texture and skin imperfections.

RESULT

Prepares skin for cosmetic treatments, and makes the skin smooth and silky. Restores radiance and tightens pores.

ACTIVE INGREDIENTS

Expert, double-action formula. Glycolic acid removes impurities, and permeates the hydroscopic film, while the coconut oil enoxolone complex soothes the skin.

Glycolic acid 15%

One of the alpha hydroxy acids (often called "fruit acids"), this very small molecule easily penetrates the skin and its acidic pH accelerates exfoliation by destroying the links that bind dead cells together.

Enoxolone

Renowned for its soothing and calming properties, enoxolone is an anti-inflammatory agent extracted from liquorice root.

100 ml
No paraben and no fragrance

Mask 15

OIL REDUCING
MASK

Astringent Clay Mask

Removes dead cells and excess sebum, and purifies combination and oily skin.

Mask 15 is recommended for oily skin, and skin that is prone to acne.

RESULT

The skin is purified, a matte appearance is restored, and pores are tightened.

ACTIVE INGREDIENTS

The unique combination of smectic clay and glycolic acid purifies and removes imperfections from the skin, tightens pores and reduces excess sebum.

Glycolic acid 15%

One of the alpha hydroxy acids (often called "fruit acids"), this very small molecule easily penetrates the skin and its acidic pH accelerates exfoliation by destroying the links that bind dead cells together.

Bentonite

Highly absorbent clay that is saturated in fat, which enables it to remove toxins and impurities from tissue.

50 ml
No paraben and no fragrance

Light Ceutic SKIN TONING NIGHT CREAM

Skin Toning Night Cream

Stimulates skin radiance and evens out the complexion. Light Ceutic is recommended for dull skin and irregular complexion.

RESULT

The complexion is harmonized and the skin's radiance is restored.

ACTIVE INGREDIENTS

The combination of glycolic acid, phytic acid and vitamin C gently exfoliates the skin and regulates the production of melanin, which causes pigment spots.

Glycolic acid 8%

Reduces corneocyte cohesion of the keratin layer of the skin, which enables homogeneous exfoliation.

Phytic acid 4%

Lightening and antioxidant agent. When associated with glycolic acid, phytic acid helps reduce the epidermal pigmentation process by blocking iron and copper ions involved in the formation of melanin.

Vitamin C

Considerably improves the skin's resistance to attacks from free radicals. The vitamin C used in this formulation is stable, and will not oxidize.

40 ml
1.35 fl.oz.

STIMULATE

Turn Over

STIMULATING
NIGHT CREAM

Rejuvenating Cream

Promotes skin turnover and reduces the appearance of signs of aging.

Turn Over is recommended to treat loss of skin tone, wrinkles and fine lines.

RESULT

The skin is smoother and appears rejuvenated.

ACTIVE INGREDIENTS

The formula of concentrated glycolic acid removes dead cells that build up on the skin's surface and stimulates cellular renewal.

Glycolic acid 15%

Reduces corneocyte cohesion of the keratin layer of the skin, enabling homogeneous exfoliation of upper layers. By removing dead cells from the skin surface, the signs of aging are less visible, the skin appears smoother, and complexion is more homogeneous.

40 ml
1.35 fl.oz.

Yellow Cream DARK SPOT CONCENTRATE

Expert Skin Toning Cream

Stimulates and promotes skin radiance and harmonizes complexion.

Yellow Cream reduces dark spots and uneven skin tone.

RESULT

Pigmentation spots are less visible and overall complexion is harmonized.

ACTIVE INGREDIENTS

The synergy of glycolic acid, salicylic acid, and highly concentrated pigment-reducing ingredients (20% of active ingredients) exfoliates the skin and regulates the production of melanin, which causes pigment spots.

Kojic acid: Because it inhibits the production of melanin, kojic acid is a proven, effective treatment of melasma (for example the mask of pregnancy).

Arbutin: Inhibits cells' production of melanin (melanogenesis) by blocking the action of tyrosinase. It is also an antioxidant.

Liquorice: A proven depigmenting agent, due to its flavonoid-rich composition. Liquorice inhibits the action of two tyrosinases, which catalyse the production of melanin. It also has soothing properties.

Morus alba: A species of fruit tree, morus alba limits the production of melanin by inhibiting the action of the tyrosinase. It is also an antioxidant.

Glycolic acid: Speeds up exfoliation and promotes cell renewal.

Salicylic acid: Causes a keratolytic action that reduces intercorneocyte cohesion, and destroys lipids that bind the outer cells of the epidermis.

15 ml
No parabens and no fragrance

C25 Cream ANTIOXIDANT CONCENTRATE

Antioxidant Day Cream

Concentrated in antioxidants which contribute to prevent damage from free radicals. C25 Cream is recommended for irregular complexion and loss of radiance.

RESULT

Complexion is harmonized and glows with natural radiance.

ACTIVE INGREDIENTS

This concentrated formula contains 25% stabilised vitamin C, vitamins A, B5, and E, and polyphenols to combat oxidative stress, and protects the skin from premature aging.

Vitamin C: A powerful antioxidant, it reduces the signs of skin aging.

Vitamin A: Improves the structure of the skin and combats the signs of aging, such as wrinkles, fine lines, uneven skin texture, and hyperpigmentation.

Vitamin B5: Reduces water loss and keeps the skin smooth and elastic due to its moisturizing properties.

Vitamin E: Renowned for its antioxidant properties, vitamin E also combats the signs of photoaging.

Polyphenols: Naturally present in plants and fruit, polyphenols combat the action of free radicals and preserve the integrity of the skin's collagen.

30 ml
No paraben and no fragrance

Sun Ceutic 50 ANTI-AGING SUN PROTECTION

Anti-Aging Sun Cream

Provides high protection for skin exposed to UV rays and helps to prevent premature aging of skin.

RESULT

The skin is restored, and protected from photoaging: spots, fine lines, dehydration.

ACTIVE INGREDIENTS

Powerful UVA/UVB filters with SPF 50 protect the skin. The dispersed micro-mineral filters allow the cream to be completely transparent, while maintaining efficacy. This unique formula also contains a powerful stem cell stimulator (EGF stimulator) and repairing active ingredients (hyaluronic acid and aloe vera).

Zinc oxide and Titanium dioxide

These mineral filters form a stable physical barrier against UVB and UVA rays.

Hyaluronic acid 1%

Creates suppleness and firmness, and moisturizes the skin. A genuine molecular "sponge," hyaluronic acid has the power to retain up to four-hundred times its weight in water.

Aloe vera

Soothes the skin, reduces inflammation, and stimulates the production of collagen to combat skin aging.

50 ml
No oxybenzone, no octocrylene, no parabens,
no fragrance and no mineral oil.

Hyal Ceutic INTENSE MOISTURIZER

Intense Moisturizing Cream

Helps moisturize the skin after aesthetic procedures. Hyal Ceutic provides essential nutrients to keep the skin hydrated all day.

RESULT

This formula is intensely moisturizing, and helps prevent the signs of premature aging of the skin.

ACTIVE INGREDIENTS

This exclusive formula combats changes in the skin, thanks to a highly concentrated combination of low- and high-molecular-weight hyaluronic acid, which is recognised for its repairing, lipid-replenishing, protective, and hygroscopic properties. Aloe vera, jojoba, and shea butter enhance the smoothing and repairing action.

Hyaluronic acid 5.5%: This formulation combines hyaluronic acid of low and high molecular weight. The low molecular weight penetrates skin deeply to ensure suppleness and firmness, and moisturizes the skin. The high molecular weight has a protective and hygroscopic role on the skin's surface.

Aloe vera 10%: Remoisturizes and regenerates cells. Aloe vera soothes the skin, reduces inflammation, and stimulates production of collagen to combat skin aging.

Jojoba oil: Creates a non-oily moisturizing layer on the skin surface, relieves sensitive epidermises, and protects the skin from UV rays.

Vitamin E: Renowned for its antioxidant properties, vitamin E also combats the signs of photoaging.

40 ml
No parabens and no fragrances

K Ceutic POST-TREATMENT
CREAM

Recovery Cream

Helps nourish the skin following aesthetic treatments, by soothing the skin and delivering essential nutrients.

RESULT

This advanced formula helps skin maintain optimal moisture, which optimizes the recovery time.

ACTIVE INGREDIENTS

This cream contains a combination of ingredients designed to repair (glycoprotein and hyaluronic acid), moisturize (shea butter), protect (vitamin E and SPF 50), and soothe (K Complex). It also provides complete sun protection (SPF 50 - UVA/UVB barriers).

K Complex

Features soothing agents essential to combat inflammation.

Glycoprotein

Favours the development of keratinocytes and the cohesion of fibroblasts while regenerating the skin.

Vitamins C and E

With renowned antioxidant properties, this combination of vitamins combats the signs of photoaging and limits their appearance.

30 ml
No parabens, no octocrylene,
no phthalates, no fragrance

PROFESSIONAL SKIN PEELS

Dermaceutic offers a full range of professional peels, and partners with dermatologists and medical aestheticians.

A professional peel is a procedure performed in a medical practice. The doctor applies a chemical solution to the skin to exfoliate superficial layers of the epidermis, resulting in a smooth and rejuvenated appearance.

The agents used in a peel will stimulate cell renewal and, depending on the formulation, can enable treatment of wrinkles and lines, pigmentation, or excess sebum. Dermaceutic has developed a range of medical peels to meet any skincare need.

Ask your specialist for advice.

Mask Peel

For oily and acne-prone skin
Dilated pores and excess sebum

Purifies epidermis and tightens pores

Milk Peel

For fine lines and muddy complexion
Loss of tone

Restores a radiant complexion and stimulates the epidermis

Spot Peel

For pigment spots and melasma
Post-inflammatory pigmentation

Reduces pigment spots and promotes homogeneous complexion

Cosmo Peel

For wrinkles and texture irregularities
Smoker's complexion and pigment disorders

Reduces signs of skin aging

■ Peel intensity

Your specialist will examine your skin, and select the appropriate peel and care for your skin type and condition.
